INTRODUCING **DIPL[☆]MAT™** WASHROOM ACCESSORIES

With unique dual-curve geometry, Bradley's latest commercial-grade accessories are a sleek and elegant finishing touch to any restroom. With an array of unique features and the most models available in this class, Diplomat Accessories complete the look of the restroom.

ROLL-TOWEL DISPENSERS are available in manual, automatic or customer choice roll-towel options.

Maintain design aesthetic in spite of towel contracts as most popular brands will fit. No more unsightly holes in the walls, less wasted paper and easy maintenance.

FOLDED TOWEL DISPENSERS are easy to load, easy to service.

WASTE CONTAINERS are available in three sizes and three mounting options.

NAPKIN/TAMPON VENDORS are ADA-compliant – no jams, no false feeds.

NAPKIN/TAMPON WASTE RECEPTACLES accept all after-market industry liners.

TOILET TISSUE DISPENSERS dispense freely with no binding – through-partition tissue dispenser also available. Seat-cover dispensers complete the line.

LOCKS are easily accessible and a single key opens all models for convenience and fast service.

SOAP DISPENSERS accept all liquid soaps and hand sanitizers. Hundreds of thousands of cycles, tested in high traffic settings.

INTRODUCING DIPLOMAT™ WASHROOM ACCESSORIES

With unique dual-curve geometry, Bradley's latest commercial-grade accessories are a sleek and elegant finishing touch to any restroom. With an array of unique features and the most models available in this class, Diplomat Accessories complete the look of the restroom.

ROLL-TOWEL DISPENSERS are available in manual, automatic or customer choice roll-towel options.

Maintain design aesthetic in spite of towel contracts as most popular brands will fit. No more unsightly holes in the walls, less wasted paper and easy maintenance.

FOLDED TOWEL DISPENSERS are easy to load, easy to service.

WASTE CONTAINERS are available in three sizes and three mounting options.

NAPKIN/TAMPON VENDORS are ADA-compliant – no jams, no false feeds.

NAPKIN/TAMPON WASTE RECEPTACLES accept all after-market industry liners.

TOILET TISSUE DISPENSERS dispense freely with no binding – through-partition tissue dispenser also available. Seat-cover dispensers complete the line.

LOCKS are easily accessible and a single key opens all models for convenience and fast service.

SOAP DISPENSERS accept all liquid soaps and hand sanitizers. Hundreds of thousands of cycles, tested in high traffic settings.

All Bradley Grab Bars are designed for safety and security of the physically disabled. The safety clearance feature is highly recommended by Barrier-Free design experts and required under most codes.

*Optional Features are listed on page 51. See technical data for **Bradex**® sizes.*

ANCHORING DEVICES

Building construction will govern the type of anchorage required.

Note: All mounting kits must be specified as optional extras. Order one kit for each flange.

See technical data for details.

Bradley will design and manufacture modified bars to satisfy unique installation applications. Contact your local Bradley representative for additional information.

FEATURES

- Heavy-duty, 18-gauge stainless steel tubing
- Meets or exceeds the requirements of ANSI Standard A117.1, the ADA and ABA Accessibility Guidelines for Buildings and Facilities (ADAAG) and the Uniform Federal Accessibility Standard (UFAS)
- Select configurations of the 812 and 817 series meet the bariatric load requirements of the American Society of Healthcare Engineers (ASHE) 2010 guidelines for design and construction of healthcare facilities
- Attractive satin finish, safety grip finish or polished safety grip finish available
- Easy to install with optional anchoring devices

HOW TO SPECIFY GRAB BARS

1. Select Series Number (812, 817, 832, etc.)

HEAVY-DUTY SERIES			
Mounting	1½" diameter	1¼" diameter	1" diameter
Concealed	812	832	852
Exposed	817	837	857

2. Select Finish Option (standard, safety grip, etc.)

FEATURE	ADD SUFFIX
Standard	0
Safety Grip Finish	2
Bright Polished Finish	4
Bright Polished Finish with Safety Grip	7

3. Select Grab Bar Configuration (001, 002, 005, etc.)

4. Select Dimensions Required

- If no modifications are required to the dimensions, an example of the Part No. is:

- Always list dimensions in alphabetical order (i.e., 36" x 20")

Note: If modifications are required to the dimensions other than A, B, or C, or if fractions are needed, contact Bradley for a submittal and special number. Unless otherwise stated, stand-off will be on long section of bar. All dimensions shown in diagrams are from wall to centerline of mounting flange or centerline of grab bar. Standard clearance is 1½".

HOW TO MEASURE A GRAB BAR

All Grab Bar Configurations are specified using centerline to centerline dimensions.

If wall dimensions are given:

- To obtain length of side bars, take clearance (1½") plus ½ of diameter of Grab Bar Series plus an additional 2" and subtract from side wall dimension
- To obtain back bar dimension, take clearance (1½") plus ½ of diameter of Grab Bar Series and subtract twice from back wall dimension

Example: 812 Series. If wall dimensions are 30" x 58" x 30", bar dimensions would be 25¾" x 53½" x 25¾".

812 SERIES

Grab bar of 1½" O.D., 18-gauge stainless steel, seamless construction with exposed surfaces in architectural satin finish. Mounting flanges concealed by snap-on escutcheons. Antimicrobial option is available for select sizes.

- 2 Safety-Grip Finish
- 4 High-Polish Finish
- 7 Safety Grip with Polished Finish on Ends

817 SERIES

Grab bar of 1½" O.D., 18-gauge stainless steel, seamless construction with exposed surfaces in architectural satin finish. Exposed mounting flanges.

- 2 Safety-Grip Finish
- 4 High-Polish Finish
- 7 Safety Grip with Polished Finish on Ends

832 SERIES

Grab bar of 1¼" O.D., 18-gauge stainless steel, seamless construction with exposed surfaces in architectural satin finish. Mounting flanges concealed by snap-on escutcheons.

- 2 Safety-Grip Finish
- 4 High-Polish Finish
- 7 Safety Grip with Polished Finish on Ends

837 SERIES

Grab bar of 1¼" O.D., 18-gauge stainless steel, seamless construction with exposed surfaces in architectural satin finish. Exposed mounting flanges.

- 2 Safety-Grip Finish
- 4 High-Polish Finish
- 7 Safety Grip with Polished Finish on Ends

852 SERIES

Grab bar of 1" O.D., 18-gauge stainless steel, seamless construction with exposed surfaces in architectural satin finish. Concealed mounting flanges.

- 2 Safety-Grip Finish
- 4 High-Polish Finish
- 7 Safety Grip with Polished Finish on Ends

HARDWARE: Heavy-duty, chromed Zamac.

SENTINEL ~ OVERHEAD BRACED – SERIES 400

Overhead braced partitions provide the most economical solution for heavy-traffic and vandalism-prone areas. Because it requires no special floor or ceiling construction, installation is easy in new or old buildings. The anti-grip head rail provides outstanding rigidity.

FLOOR BRACED – SERIES 500

This style complements design with functional performance. Recommended for buildings with high ceilings, it enhances the effect of spaciousness. A minimum of 3" concrete construction is required for anchoring. This style is not available in Bradmar solid plastic.

CEILING HUNG – SERIES 600

Ideal for areas with low ceilings. Offering an area free from obstruction to allow for fast and easy maintenance, this system requires proper structural supports in the ceiling for maximum rigidity. Not recommended for ceiling heights over 8 feet. This style is not available in Bradmar solid plastic.

FLOOR-TO-CEILING – SERIES 700

Anchored at the floor and ceiling, main structural support can be provided by Series 500 or 600 mounting systems. Perfect for areas where additional support is required.

URINAL SCREENS

Wall-hung style provides economy and ease of maintenance while floor supported or floor-to-ceiling (not shown) screens offer extra stability for high-traffic areas.

SHOWER DIVIDERS

Available in Bradmar® solid plastic, an advanced formula of high-density polyethylene (HDPE). Standard sized or customized to meet your facility layout, Bradmar shower dividers are available in multiple colors, including speckled and solid colors (see bradleycorp.com for complete list of colors). All Bradmar solid plastic products are covered by a 15-year warranty.

Design flexibility is a prime feature of Lenox® Lockers, offering countless options and configurations. Installation is simple. Lockers are shipped fully assembled and ready for attachment to the wall and each other.

Solid plastic lockers are formed of polymer resin with homogeneous color. Doors and frames are ½" thick, and sides, shelves, tops and bottoms are ⅜" thick. Locker box is one piece, all welded construction, providing outstanding rigidity and strength. Continuous latch bar runs the entire length of the door, providing a secure closure. Handle mechanism is capable of accepting a padlock and is securely fastened to the door. Stainless steel piano hinge is continuous and integrates into the full length of the door and main locker body.

20-year warranty against rust, delamination or breakage of any of the plastic components under normal use.

MAINTENANCE INSTRUCTIONS

STAINLESS STEEL

Stainless Steel is a low-carbon steel that contains chromium. The addition of chromium gives the steel its unique corrosion-resisting properties. It is extremely durable, resists corrosion, and stands up to many chemicals.

Despite the fact that stainless steel surfaces are generally non-tarnishing, they are not stain or rust proof. Stainless steel must be kept clean and free from contaminants. Frequent cleaning with mild soap and water or glass cleaner and a cotton cloth is required. Any discoloration or corrosion commonly caused by contact with harsh cleaner, muriatic acid or bleach solution should be removed as soon as possible or permanent discoloration and pitting of the surface could occur. Most discoloration can be removed with a mild cleanser or stainless steel cleaner and a Scotchbrite pad. The surface should then be thoroughly rinsed with clear water. With proper maintenance, stainless steel will maintain its luster and appearance indefinitely.

MIRRORS

Bradley mirrors are fabricated from heavy-gauge stainless steel frames and plate glass or an alternative reflective surface. The frame can be cared for by following the general stainless steel maintenance instructions above. Reflective surfaces can be cleaned with any standard non-abrasive glass cleaner and a soft cloth. Care must be taken to avoid allowing the cleaner to run down the surface of the mirror and collect in the frame. If allowed to continue, this could lead to premature silver spoilage and spotting on stainless steel.

SOAP DISPENSERS

Bradley soap dispensers provide dependable, consistent operation over the long term when the proper soap is used and when a minimal amount of periodic maintenance is performed on the valves. Soaps satisfying these basic guidelines will provide consistent flow and reduce clogs.

Soap thickness is determined by a measurement called viscosity. Soap viscosity should be between 100 cps (centipoise) and 2500 cps for all Bradley soap dispensers. The pH (acid) level of soaps that will perform consistently should be in the range of 6.5 to 8.5. More acidic soaps (pH levels lower than 6.5) will corrode metal parts (even stainless steel) and degrade rubber and plastic components. Most inexpensive soaps (typically the pink lotion type) fall into this acidic category and will eventually cause valve failure and metal corrosion. PCMX or Isopropanol-based antibacterial soaps (within viscosity and pH limits) will also work with Bradley dispensers.

Valves must also be maintained (cleaned) to function properly. At the very minimum, hot water should be pumped through valves periodically to clear out soap residue. Ideally valves should occasionally be soaked for 30 minutes in hot water or a soap valve cleaning solution. With proper maintenance and soap, Bradley dispensers will provide long-term, trouble-free operation.
